

Priyanka Parmar

priyankajanssen@gmail.com | [in priyankaparmar](https://www.linkedin.com/in/priyankaparmar)

Experienced IT Professional with over 13 years of experience in leading, designing and delivering complex projects and transition programs. Because of my broad experience across many aspects I have led large scale transformation programmes and offshoring projects involving multiple disciplines and partners. My engineering background enables me to quickly grasp new concepts, tools and technologies.

Personal values I hold very dear are honesty, integrity and trust. I believe in it's important to say what you really think and provide an open communication environment therefore I am able to build strong teams and meaningful relationships.

On a side note, I'm absurdly good at eating spicy food. Unfortunately, there's not much of a market for that skill...

Skill Summary

- o Machine learning
- o Natural language processing
- o Robotic Process Automation
- o Strategic Planning
- o revenue modeling & forecasting
- o account management
- o project planning
- o project management
- o programme management
- o transition management
- o complex transformations
- o agile
- o scrum
- o object oriented programming
- o lean
- o value chain analysis
- o ITIL
- o programming

Education

- 2018 **Nyenrode Business University**
MBA in business and IT, Thesis in Artificial Intelligence in Psychology
- 2006 **Engineering Univeristy of Mumbai Information Technology**
Bachelor's degree with distinction in engineering
- 2003 **University of Mumbai**
Diploma in computer science

Languages

- o English (Fluent)
- o Dutch (level A2 – can understand fully, can converse but not business fluent)
- o Hindi (Native)

Recent experience

IPSOFT

2017 -

Engagement Manager - Cognitive Solutions (Amelia Virtual Agent)

Manage and build positive relationship provide excellent experience to all customers under the Benelux and Nordics region after they signed a contract for implementation of conversational AI agent Amelia.

- Managing client expectations, and working with the sales team to identify additional opportunities / use cases to implement Amelia to maximize value for the client.
